

Study Guide for Week1

Expectations

1. Install VM emulator software in your operating system such as VirtualBox(Windows, Mac), Vmware Fusion(Windows, Mac) or UTM (Mac)
2. Once you have successfully installed a VM, always make sure you can find out the actual image file and backup it to a USB drive just in case something broken and you have to redo it.
3. Download the PDF from module 1 and learn the linux commands, directories and ssh.
